## ABOUT ME

Software Engineer with 4+ years of experience in building web applications using React and Next.js. Experienced in backend development with Go and cloud infrastructure on AWS (CloudFront, ECR, Lightsail).

## WORK EXPERIENCE

**Synergy Global Network Co., Ltd.** April 2026 - present  
Full-stack developer

- Migrated internal Legal Management (LM) web application from Mendix to a custom solution using Next.js and Golang at MBK Group.
- Redesigned and improved UI/UX for the LM project in the absence of a dedicated designer, enhancing usability and visual consistency across the application.
- Acted as a Business Analyst by conducting user workflow analysis and creating wireframes to bridge the gap between outdated documentation and actual production UI.
- Mentored an intern developer by assigning tasks, providing guidance, and onboarding them to the LM project.

**3i Infotech (Minor Hotels)** May 2025 - March 2026  
Full-stack developer

- Developing a Next.js 15 web application using TypeScript and Tailwind CSS for Minor Hotels' Smart FrontDesk.
- Built real-time WebSocket services using Go (Golang) with token-based authentication.
- Architected the system to scale across multiple hotels globally with dynamic hotel and station configurations.
- Dockerized services and deployed via AWS ECR + Lightsail (Dev/UAT/Prod).
- Designed and implemented a security architecture using AWS CloudFront and WAF with IP allowlists to prevent unauthorized access, and configured CloudFront as a secure reverse proxy to protect backend services.

## WORK EXPERIENCE

### **Muang Thai Life Assurance PCL.**

**June 2023 -**

Frontend developer

**December 2024**

- Developed internal insurance management app on health claims using ReactJS, Tailwind CSS, and micro-frontend architecture.

### **24 FIX co., ltd**

**October 2022 - February 2023**

Full-stack developer

- Implemented the internal admin system for package management using React, Node.js, and MongoDB.
- Built RESTful APIs using Node.js following modular architecture patterns (controllers, services, repositories), consistent with NestJS conventions.
- Designed and implemented data storage systems for package tracking.

### **4-ti (Startup)**

**October 2021 - September 2022**

Full-stack developer

- Maintained and extended rikai.ch platform with React (TypeScript), KoaJS, and MongoDB.
- Developed TypeScript backend services with KoaJS using structured routing, middleware, and module separation - patterns directly applicable to NestJS.
- Implemented features for managing customer blood test results and displaying doctor/clinic details.
